3. (S) I would like to stress two points which have been presented:

a. 17040 personnel (18000 as rounded off by DOD) are required to eliminate line deletions and deficiencies in D-Series TOEs and to make USAREUR forces ready for initial combat at the minimum acceptable posture.

b. 19213 additional personnel are required to provide for additional non-divisional units essential to give current USAREUR forces the capability for sustained combat.

4. (S) The fillers required under 3a are necessary if the US is to do what it is urging others to do as a first priority, i.e., bringing deployed combat units to full effectiveness. The 3b personnel are in a different category, it is true, but they are essential to give current USCOMBATTOR forces a sustained combat capability and to establish a stronger base on which to deploy additional units if necessary. Recognizing that filling the 3b requirement may step up the political significance to a higher level, movements could be phased for minimum or no reaction, as may be desired by the political authorities. SCP-4.
